1. FEATURES

- Uses TSI™ (Target Specific Imaging) technology for distinction between humans and pets
- Immunity to pets weighing up to 36 kg (80 lb)
- Includes a fully supervised PowerCode transmitter
- Patented sophisticated motion analysis algorithm - True Motion Recognition (TMR™)
- Three-position vertical adjustment scale
- Integral swivel bracket for wall or ceiling installation
- Programmable motion event counter - ON (default) or OFF
- Front tamper switch
- Back tamper switch (option)
- Full stabilization achieved 30 seconds after power up
- After detection, the detector disables itself to save battery power. It reverts to the ready state if there is no subsequent detection throughout the following 2-minute period
- An optional version provides better protection for systems compliant with DD243. After initial detection, the detector is capable of 6 additional detections for a period of 5 minutes.

Further detection is possible only if no movement occurs during the following 2 minutes. The detector will revert to the initial state if there is no movement for 5 minutes.

- Automatic termination of walk-test after 15 minutes
- Low current consumption
- Full temperature compensation
- Microprocessor-controlled temperature compensation
- Sealed chamber protects the optical system
- White light protection
- Elegantly styled, sturdy case
- Keyhole-shaped slot for easy removal of PCB

2. SPECIFICATIONS

OPTICAL
Max. Coverage Range: 12 x 12 m (40 x 40 ft) / 90°.
For Belgium 10x10m / 90°

Pet Immunity: Animals up to 36 kg (80 lb)

Vertical Adjustment: 3-position adjustment scale: 1.8 m (6 ft), 2.1 m (7 ft) and 2.4 m (8 ft).

ELECTRICAL
Internal Battery: 3V Lithium battery, type CR-2.

Nominal Battery Capacity: 750 mAh

Standby Current Drain: 0.015 mA

Transmit Current Drain: 20mA (including LED)

Battery Life Expectancy (with LED jumper in ON position): Typically over 3 years (regular version); 2 years (DD243 version).

Battery Supervision: Automatic reporting of battery status with each alarm and with periodic supervision message.

FUNCTIONAL
True Motion Event Verification: 2 position selector - 1 (OFF) or 2 (ON) motion events.

Alarm Period: 3 seconds

Visual Indications:
LED lights for about 3 seconds upon transmission of alarm & tamper messages and upon each motion detection in the walk test mode.

LED flashes during the power-up stabilization period, or after restoring (pressing) the tamper switch.

LED does not light upon transmission of supervision messages.

Rearm Timer (regular version only): Rearms the detector 2 minutes after the last alarm. Timer disabled in the walk test mode.

WIRELESS
Frequency (MHz): 315 (U.S. version), 433.92, 868.95, 869.2625 or other frequencies according to local requirements.

Transmission Sequence: 3 data bursts at variable intervals within 3 seconds.

Encoding: 24-bit ID, over 16 million possible combinations.

Total Message Length: 36 bits.

Supervision Message: Signaling at 60 minutes interval (U.S. version), 15 minute interval (UK version) or according to local standards.

MOUNTING
Height: Up to 2.4 m (8 ft)

Installation Options: Surface or corner (without bracket); surface or ceiling (with bracket)

Bracket Adjustment: 20° downward (only in non-pet immune applications), 20° left and right

ENVIRONMENTAL
RFI Protection: >30 V/m up to 1000 MHz.

Operating Temperatures: -10°C to 50°C (14°F to 122°F).

Storage Temperatures: -20°C to 60°C (-4°F to 140°F).

PHYSICAL
Dimensions (H x W x D): 117 x 65 x 47 mm.
(4-1/2 x 2-9/16 x 1-7/8 in.)

Weight: 92 g (3.25 oz) without bracket, 107 g (3.75 oz) with bracket.

Color: White

PATENTS: U.S. Patent No. 5,693,943

3. INSTALLATION

3.1 Installation Hints

Important! The detector is immune to 36 kg (80 lb) animals moving on the floor or climbing on furniture as long as the activity takes place below 1 m (3 ft). Above the 1 m (3 ft) height limit, the detector is immune to 18 kg (40 lb) pets, but the pet immunity will decrease as the pet gets closer to the detector. It is therefore recommended to select a mounting location that minimizes potential close proximity of animals.
To minimize false alarms:

- Do not aim at heat sources
- Mount on solid, stable surfaces
- Do not expose to air draughts
- Do not install outdoors
- Prevent direct sunlight from reaching the detector
- Keep wiring away from electrical power cables
- Do not install behind partitions

Prevent direct sunlight from reaching the detector

Keep wiring away from electrical power cables

3.2 Battery Insertion
It is recommended to power up the detector and let the target receiver “learn” the transmitter’s ID before actual installation. This can be done only after battery installation.

A. Remove the front cover as shown in Figure 3.

B. Insert the battery into the battery clip - observe polarity (see Figure 4).

C. Press the tamper switch once and release it. This will perform the reset necessary for smooth power up.

D. Put the cover on and observe the LED. It will flash until the detector stabilizes (within about 30 seconds).

3.3 Enrolling the Transmitter ID
Refer to the target receiver's installation instructions and follow the procedure given there for “teaching” the transmitter's ID. It is much easier to carry out this operation in close proximity to the receiver.

3.4 Mounting without Swivel Bracket

A. Remove the front cover as shown in Figure 3.

B. Loosen the vertical adjustment screw, slide the PCB down and remove it via the “keyhole” (see Figure 4).

C. Punch out the mounting knockouts at the base (for surface mounting) or mounting knockouts at the angled sides of the base (for corner mounting).

Attention! The unit has a back tamper switch (option) under the PCB. As long as the PCB is seated firmly within the base, the switch lever will be pressed against a special break-away base segment that is loosely connected to the base (Figure 5). Be sure to fasten the break-away segment to the wall. If the detector unit is forcibly removed from the wall, this segment will break away from the base, causing the tamper switch to open. It is advisable to pierce the anti-tamper knockouts from within the base outward, while pressing the rear surface of the break-away segment against a piece of wood.

3.5 Mounting with Swivel Bracket

A. Remove the front cover as shown in Figure 3.

B. Loosen the vertical adjustment screw, slide the PCB down and remove it via the “keyhole” (see Figure 4).

C. Punch out the large knockout in the round bulge at the top part of the base (see Figure 6).

D. Assemble the bracket as shown in Figure 6.
F. Mark the points for drilling through the two mounting holes of the bracket. Attach the bracket to the mounting surface.

G. Tilt down or swivel the detector to face the desired direction. Figure 8 shows the tilt/swivel possibilities.

3.6 Setting the Motion Event Counter
The location of the motion event jumper is shown in Figure 4. Refer to Figure 9 below and mount the jumper as desired.

3.7 Setting the LED Control Jumper
ON Position: Setting the jumper as shown enables the LED. Remember that the detector disables itself for 2-minutes after detection!
OFF Position: Setting the jumper as shown disables the LED.

Note: At power up or reset, the LED flashes for 30 seconds regardless of the jumper position and then enters walk-test mode. After 15 minutes the detector enters normal mode in which the LED functions according to the LED control jumper position.

3.8 Vertical Adjustment
A. Pet-Immune Applications
To maintain maximum coverage range and pet immunity, the vertical adjustment scale must be adjusted in accordance with the actual mounting height (refer to Figure 10). Loosen the vertical adjustment screw and slide the printed circuit board up or down until the pointer shows the actual mounting height on the scale. When done, re-tighten the screw well.

B. Pet-Free Locations
To obtain the best coverage possible where no pets are present, mount the detector with the integral bracket at any desired height between 1.8 m (6 ft) and 2.4 m (8 ft). Then set the vertical adjustment scale to the 2.4 m (8 ft) position and tilt the detector 20° down.

3.9 Walk Testing
Upon battery insertion or closing of the cover (which results in closing of the tamper switch) the detector goes into walk-test mode and automatically exits the mode after 15 minutes.

A. Set the motion event counter as required (see Paragraph 3.6).
B. Adjust the vertical angle as desired (see Paragraph 3.8).
C. Remount the cover and fasten the case closure screw. This results in the resetting of the detector and the start of walk-test mode.
D. Wait until the LED stops flashing (about 30 seconds).
E. Walk-test the entire protected area by walking slowly across the detector's field of view, observing the LED. Pause for 5 seconds after each detection to allow the detector to complete its 3-transmission sequence; the LED will light for about 3 seconds.
F. When the walk-test is completed (after 15 minutes), the detector's setting automatically changes according to the LED control jumper setting.

Notes:
1. The OFF setting is recommended to prevent unauthorized people from tracing the detector's coverage pattern.
2. If the LED is disabled, you may use the control panel's visual and audible indicators to verify proper function of the detector.

4. MISCELLANEOUS COMMENTS

4.1 Product Limitations
Visonic Ltd. wireless systems are very reliable and are tested to high standards. However, due to their low transmitting power and limited range (required by FCC and other regulatory authorities), there are some limitations to be considered:

A. Receivers may be blocked by radio signals on or near their operating frequencies, regardless of the code selected.
B. A receiver can only respond to one transmitted signal at a time.
C. Wireless equipment should be tested regularly to determine whether there are sources of interference and to protect against faults.

4.2 Frequency Allocations for Wireless Devices in European (EU) Countries

- 433.92 MHz has no restriction in any EU member state.
- 315 MHz is not allowed in any EU member state.
- 868.95 MHz (wide band) is allowed in all EU member states.
- 869.2625 MHz (narrow band) is not restricted in any EU member state.
4.3 Compliance with Standards

This device is designed to comply with the essential requirements and provisions of Directive 1999/5/EC of the European Parliament and of the Council of 9 March 1999 on radio and telecommunications terminal equipment.

The 315 MHz model of this device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference that may be received, including interference that may cause undesired operation.

The user is cautioned that changes or modifications to the unit, not expressly approved by the party responsible, could void the user’s FCC authority to operate the equipment.

The digital circuit of this device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio and television reception. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause such interference, which can be verified by turning the device off and on, the user is encouraged to eliminate the interference by one or more of the following measures:
- Re-orient or re-locate the receiving antenna.
- Increase the distance between the device and the receiver.
- Connect the device to an outlet on a circuit different from the one which supplies power to the receiver.
- Consult the dealer or an experienced radio/TV technician.

At 315 MHz the product complies with FCC requirements.

WARRANTY

Visonic Limited (the “Manufacturer”) warrants this product only (the “Product”) to the original purchaser only (the “Purchaser”) against defective workmanship and materials under normal use of the Product for a period of twelve (12) months from the date of shipment by the Manufacturer. This Warranty is absolutely conditional upon the Product having been properly installed, maintained and operated under conditions of normal use in accordance with the Manufacturers recommended installation and operation instructions. Products which have become defective for any other reason, according to the Manufacturers discretion, such as improper installation, failure to follow recommended installation and operational instructions, neglect, willful damage, misuse or vandalism, accidental damage, alteration or tampering, or repair by anyone other than the manufacturer, are not covered by this Warranty.

The Manufacturer does not represent that this Product may not be compromised and/or circumvented or that the Product will prevent any death and/or personal injury and/or damage to property resulting from burglary, robbery, fire or otherwise, or that the Product will in all cases provide adequate warning or protection. The Product, properly installed and maintained, only reduces the risk of such events without warning and it is not a guarantee or insurance that such events will not occur.

This Warranty is exclusive and expressly in lieu of all other warranties, obligations or liabilities, whether written, oral, express or implied, including any warranty of merchantability or fitness for a particular purpose, or otherwise. In no case shall the Manufacturer be liable to anyone for any consequential, or incidental damages for breach of this warranty or any other warranties whatsoever, as aforesaid. The Manufacturer shall in no event be liable for any special, indirect, incidental, consequential or punitive damages or for loss, damage, or expense, including loss of use, profits, revenue, or goodwill, directly or indirectly arising from purchaser’s use or inability to use the Product, or for loss or destruction of other property or from any other cause, even if manufacturer has been advised of the possibility of such damage. The Manufacturer shall have no liability for any death, personal and/or bodily injury and/or damage to property or other loss whether direct, indirect, incidental, consequential or otherwise, based on a claim that the Product failed to function.

However, if the Manufacturer is held liable, whether directly or indirectly, for any loss or damage arising under this limited warranty, THE MANUFACTURER’S MAXIMUM LIABILITY (IF ANY) SHALL NOT IN ANY CASE EXCEED THE PURCHASE PRICE OF THE PRODUCT, which shall be fixed as liquidated damages and not as a penalty, and shall be the complete and exclusive remedy against the Manufacturer.

When accepting the delivery of the Product, the Purchaser agrees to the said conditions of sale and warranty and recognizes having been informed of.

Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so these limitations may not apply under certain circumstances.

The Manufacturer shall be under no liability whatsoever arising out of the corruption and/or malfunctioning of any telecommunications or electronic equipment or any programs.

The Manufacturers obligations under this Warranty are limited solely to repair and/or replace at the Manufacturer’s discretion any Product or part thereof that may prove defective. Any repair and/or replacement shall not extend the original Warranty period. The Manufacturer shall not be responsible for dismantling and/or reinstallation costs. To exercise this Warranty the Product must be returned to the Manufacturer freight pre-paid and insured.

All freight and insurance costs are the responsibility of the Purchaser and are not included in this Warranty.

This warranty shall not be modified, varied or extended, and the Manufacturer does not authorize any person to act on its behalf in the modification, variation or extension of this warranty. This warranty shall apply to the Product only. All products, accessories or attachments of others used in conjunction with the Product, including batteries, shall be covered solely by their own warranty. If any — the Manufacturer shall not be liable for any damage or loss whatsoever, whether directly, indirectly, incidentally, consequentially or otherwise, caused by the malfunction of the Product due to products, accessories, or attachments of others, including batteries, used in conjunction with the Products. This Warranty is exclusive to the original Purchaser and is not assignable.

This Warranty is in addition to and does not affect your legal rights. Any provision in this warranty which is contrary to the Law in the state or country were the Product is supplied shall not apply.

Warning: The user must follow the Manufacturer’s installation and operational instructions including testing the Product and its whole system at least once a week and to take all necessary precautions for his/her safety and the protection of his/her property.

WEEE Product Recycling Declaration
For information regarding the recycling of this product you must contact the company from which you originally purchased it. If you are discarding this product and not returning it for repair then you must ensure that it is returned as identified by your supplier. This product is not to be thrown away with everyday waste.
