## Visonic Limited

### **Agreement signed between Visonic and Smith & Wesson Security Services**

Visonic Limited (LSE: VSC.L; TASE: VSC.TA) ("Visonic" or the "Group"), the international developer and manufacturer of electronic security systems (alarms) and home management systems, is pleased to announce that it has entered into an agreement to incorporate its PowerMax line of wireless alarm systems into the product offering of Smith & Wesson Security Services.

PowerMax products enable Smith & Wesson Security Services dealers to wirelessly secure up to 29 separate zones within their residential customers' properties.

Smith & Wesson Security Services selected Visonic's PowerMax system because the technology is easy to set up, use and manage a wide range of connected systems, including security and fire alarms. The PowerMax allows remote, mobile, and in-house control of wireless alarm devices and secured zones and is the newest system Smith & Wesson Security Services has added to its extensive line of electronic alarms. PowerMax products connect seamlessly with a wide range of wireless transmitters and detectors, including door and window contacts, glass-break sensors, pet-immune motion detectors, smoke and carbon monoxide detectors, flood sensors and more.

#### **Commenting, Dr. Avigdor Shachrai, CEO and President of Visonic, said:**

"We are delighted that our product has been chosen by a company as iconic and highly respected in the security industry as Smith & Wesson, we look forward to a successful business relationship. The PowerMax range is Visonic's flagship wireless security system and dovetails perfectly with the exciting stable of high quality security products and services provided by Smith & Wesson.

"The user-friendly interface of the PowerMax makes it the smart choice for families and for homes with small children or elderly residents. The system is controlled with an easy-to-use remote control and can be linked flawlessly with Smith & Wesson Security Services' 24/7 monitoring stations."

"Building on the worldwide success of the PowerMax platform, PowerMax Pro has earned its place as a top solution in its category in Europe and is now quickly becoming the solution of choice for security conscious customers in the United States."

#### **Commenting, Aaron Wahrsager, COO of Smith & Wesson Security Services, added:**

"We are pleased to announce this agreement with Visonic, which will help to bring high quality wireless security systems into homes across the nation. The PowerMax system provides flexibility, ease of use, and quick installation - all without sacrificing one bit of reliability," he adds. "These are the unique advantages that make PowerMax a perfect fit for our Authorized Security Dealers and their customers. Our agreement with Visonic expands our product offering to include a wireless system that is particularly well-suited for mobile or small applications. Smith & Wesson Security Services dealers can install the PowerMax quickly, making it a cost-efficient, high-performance security solution".
