Visonic's PowerMax® Complete is an innovative all-in-one professional grade wireless security system for homes and small offices. It provides a complete, modular solution for all aspects of security, safety and connectivity.

The PowerMax® Complete control panel introduces a new level of flexibility, modularity and affordability to residential security. Security professionals and service providers can expand their offering to include comprehensive security and safety while keeping down total costs. And, homeowners can get an ideal system without paying for unneeded capabilities and upgrade the system as necessary.

Featuring multiple performance and configuration options, and the possibility to easily add internal communications modules for GSM, GPRS and/or Broadband IP* reporting channels, PowerMaxComplete enables service providers to fully meet customer needs regardless of the available communications infrastructure or future changes.

* All add-on communications modules need to be purchased separately. GPRS communication requires a GPRS enabled PowerMaxComplete control panel. The Broadband module is expected to become available in 2010. Please contact Visonic for more information.
One Panel = Complete Modularity

**Upgrade Options**
- Voice functionality options – including two-way voice communication, voice prompts and family message center
- Proximity reader (two tags included)
- External or internal power supply (12V)

**Expander Module**
- Two additional hard-wired zones
- PGM output
- Wired siren output
- Speech Box interface for remote voice communication
- 12V power supply

**GSM-350**
- Internal redundancy of GPRS, GSM and SMS - ensures maximum reliability for the delivery of events to the central alarm station
- Supports any residential infrastructure as a back-up or primary communication channel
- Easy to configure and install
- Full encryption of GPRS messages using SIA/IP protocols
- SMS event notifications to up to four users
- Two-way voice communication
The residential security environment today is not what it used to be. Gone are the days when installers could be certain of a landline telephone line at every site. Gone are the days when consumers were satisfied with a one-size-fits-all approach to their security system communications.

Today, at any individual site, landline, GSM and IP communication can all exist, alone or in any combination. Moreover, the available communications options can rapidly change as technology and markets develop. With all these variables, security professionals need to be able to offer the optimal communications and backup options for the widest array of customers. And, they need to be able to update installed security solutions as infrastructure changes.

PowerMaxComplete provides everything needed to easily and cost-effectively meet homeowners’ needs in today’s evolving communications environment. Modular and both Broadband IP and GSM/GPRS-ready, this all-in-one professional grade control panel enables professionals to offer a security system with the most suitable connectivity and security backup to ensure uninterrupted communication in case of a link failure or interference. Installation and future upgrades are quick and easy: even years after installation, the communications modules can be added or changed according to infrastructure availability.
Today’s homeowners want much more than a monitored security system. They want a system that can alert them – wherever they are, at home or away – in the event of burglary, fire or flood, or a medical emergency involving a home-bound family member.

With Visonic’s market-leading range of wireless accessories, PowerMaxComplete provides homeowners with a comprehensive blanket of security, safety and control covering all aspects of home protection – to safeguard everyone at home, as well as the building and contents. Security professionals can offer a full range of wireless accessories that work seamlessly with the PowerMaxComplete control panel to ensure timely detection and alert of virtually any kind of risk to the home and people in it.
Complete range* of market-leading wireless accessories to fit the needs of every customer

PowerMax® Complete professional-grade wireless home security and safety system can be extended with a diverse range of easy-to-add accessories: wireless intrusion detectors; wireless safety detectors and personal emergency response transmitters help save lives and prevent personal injury; and wide variety of control options increase ease of use and convenience. The flexible and diverse choice of expansion options and drilling-free wireless installation offered, make the Visonic home security solution a dynamic choice that fits the needs of every customer.

**Security**

**Motion Detectors**
Wireless, digital motion detectors with a pet-tolerant model for animals weighing up to 38kg (85lb) and a contemporary design that suits any décor

**Outdoor Detector**
Advanced wireless outdoor motion detector for harsh environment, with virtually no false alarms

**Curtain Detector**
Wireless, miniature curtain-type motion detector for the protection of doors, windows and all-glass walls

**Motion Mirror Detector**
Wireless, mirror-type motion detector with extended range of 18m - ideal for commercial applications and large residences

**Safety**

**Smoke Detector**
Wireless smoke detector with loud alarm sound and visual notifications

**Carbon Monoxide (CO) Detector**
Gives early warning before CO levels become dangerous; 5 years sensor live

**Control**

**Keyfob**
Comfortable and attractive keyfob with miniature design that enables easy arming and disarming

**Remote Commander**
User-friendly universal remote commander to control the security system

**Two-way Keyfob**
Attractive and ergonomic design, provides instant feedback of system status and commands

**Emergency**

**Pendant-style Transmitter**
Attractive, waterproof pendant-style transmitter with one button click for immediate emergency response

**Fall Detector**
Fully waterproof, factory-sealed emergency button with integrated fall detector that eliminates the danger of undetected falls

---

* Partial list, actual design may be different to the design in images, some products and models may not be available in all regions. Please contact Visonic to get more information.
Flood Detector
Highly sensitive, detects water at ground level

Gas Detector
Provides warning in case of natural gas leaks (Methane CH4, commonly used for cooking)

Temperature Detector
Issues an alert when the ambient temperature reaches predetermined thresholds; detects indoor or outdoor temperatures

Magnetic Contact
Wireless compact door/window protector almost invisible on the wall

Indoor Siren
Self-powered, fully-wireless indoor siren and strobe with a sleek and modern design that fits any interior

Outdoor Siren
Self-powered, fully-wireless outdoor siren and strobe with a choice of red, blue, orange, or white strobe light lenses

Transmitters for emergency and control
Single, two or four channel handheld transmitters for control applications and emergency response

Speakerphone
Extends the voice notifications and two-way voice communications capabilities of the security system to remote locations around the home

Two-way Voice Keypad
Extends the functionality of the control panel to an additional location in the house

Wristband Transmitter
Attractive, waterproof wristband transmitter with one button click for immediate emergency response

Emergency Button
One button click for immediate emergency response; with large red button and back light to make it easily visible during day or night. Optional humidity-resistant silicon pocket enables safe use in humid environments such as bathrooms, showers, and gardens
About Visonic

The Visonic Group (LSE:VSC.L; TASE:VSCTA), founded in 1973, is an international developer and manufacturer of high-quality electronic security systems and components. We are dedicated to enhancing people's way of life by increasing their sense of security. Our easy-to-use and innovative home security and control solutions and personal emergency response systems are vital parts of everyday family life. By providing real-time connectivity between families, homes, property, care givers and community support networks, we empower people to pursue their daily lives with full confidence that the people and things they care most about are safe and comfortable.

Visonic is headquartered in Israel, where we operate a development center and manufacturing plant. Our sales and marketing subsidiaries in the USA, Germany, UK, Poland, Spain and Hong Kong are supplemented by a worldwide network of distributors, serving a growing installed based that spans more than 70 countries.
