Visonic Interim Results

Visonic (LSE: VSC.L; TASE: VSC.TA), the international developer and manufacturer of electronic security systems (alarms) and home management systems, announces its Interim Results for the half year ended 30 June 2007.

Key Points

• Group sales showed a strong growth of 13%
• Strong balance sheet with $12.6m in cash and equivalents
• Profit before tax decreased to $1.0m (from $4.4m in H1-2006)
• Decline in earnings per share (from 9.6 cents in H1-2006) to 2.3 cents in H1-2007
• Continued adverse currency movements impacted on margins
• Slower than expected recovery at Visonic Technologies
• Increased investment in R&D and sales and marketing
• Major new product, PowerMax Pro, well received by market

Chairman's & CEO's Statement

Results Overview

The Group's revenues in the first half of 2007 (to 30 June) showed a strong 13% increase to $37.1 million over the $32.7 million achieved in the first half of 2006.

Sales by business segments showed mixed results. The Group's core business achieved sales growth of almost 15%. This result reflects the success of Visonic's strategy of building sales by developing new channels to market; the impact of the introduction of sophisticated new products such as the PowerMax Pro, made possible by Visonic's intensive Research & Development (R&D) programme; the elimination of the production and delivery problems suffered last year; and not least, the efforts of our Sales Team.

Sales of the Location Tracking Systems division, which largely comprises Visonic Technologies ("VT") Real Time Location Solutions, were almost flat.

Sales of core business products across all the Group's major geographic markets were encouraging: revenues in our domestic market, Israel, showed a substantial increase of 27.3%. Sales to the UK were markedly strong, up 23.1%; sales to North America showed an increase of 13.5%; sales to the former Soviet Union grew dramatically by 69.9% from a low base, reflecting a new contract with our distributor and finally, sales to Mainland Europe rose by 10.2%.

A number of adverse factors continued to maintain pressure on Visonic's margins in the first half. About half of the shortfall against our budgeted figures related to continued unfavourable currency movements and a slower than expected recovery at Location Tracking Systems. In addition, some price erosion was suffered in the core business and we increased our investments in R&D, essential to maintain Visonic's market-leading position in wireless technologies and in Sales and Marketing. A significant part of the increase in Sales and Marketing expenses relates to a major worldwide
customer meeting in Portugal. We hold these events, aimed at enhancing customer relationships, every three to four years.

As a result of these factors, the gross profit margin was 41.7% against 48.7% for the first half of 2006 and profit before tax decreased to $1.0m (H1-2006 $4.4m). The average tax rate was reduced to 8% in the interim period reflecting a lowering of the tax rate in Israel and the tax benefits to which the company is entitled as an Approved Enterprise. For this reason, earnings per share were 2.3 cents (H1-2006 9.6 cents).

The Group’s balance sheet remained strong with $12.6m in cash and cash equivalents. Equity represented 64% of the balance sheet total. Cash flow from operating activities was, however, negative and amounted to $2.6 million, mainly because of an increase in trade receivables of $3.7 million, which was caused by strong sales during the last two months of the period.

Core Business

Visonic’s ongoing commitment to investment in R&D supports a robust new product development and upgrade programme. The flagship product, the PowerMax Pro wireless security system, provides internet accessible home and office security and control and coupled with the PowerLink peripheral, extends this coverage to internet based visual surveillance.

The Group’s range of comprehensive solutions for the residential environment have proven attractive to new distribution partners such as global telecommunications and utilities companies. The Group signed a number of technology development and supplier agreements during the first six months of 2007 with companies including Prosegur, MITGAS and Eureca.

In the reported period, the Company launched a new model of the Amber System, Amber Select, enabling Bluetooth connectivity to Telemedicine devices to European standards.

Location Tracking Systems

During the first half, VT signed a technology development agreement with Ascom (Sweden) AB, a global leader in on-site wireless solutions for mission-critical communications in healthcare, industry, secure establishments, hotels and retail. VT supplied and will continue to supply to Ascom, Elpas RTLS and Active RFID healthcare-enabled products for integration into Ascom’s next-generation Wireless Nurse Call solutions.

Outlook

The Board has carried out a thorough review of the first half performance and has maintained a programme of cost reduction and efficiency improvements which is expected to save over US$1 million in the course of a full year. The effects of this programme will become apparent towards the end of 2007, with the full benefit to be achieved in 2008.

**) Reclassified.

The accompanying notes are an integral part of the interim condensed consolidated financial statements.
NOTE 1:- GENERAL

These financial statements have been prepared in a condensed format as of 30 June 2007 and for the six month period then ended. These interim financial statements are to be read in conjunction with the annual financial statements of the Company as of 31 December 2006, and their accompanying notes.

NOTE 2:- SIGNIFICANT ACCOUNTING POLICIES AND METHODS OF COMPUTATIONS

These interim condensed financial statements for the six months ended 30 June 2007 have been prepared in accordance with IAS 34, "Interim Financial Reporting".

The significant accounting policies and methods of computations applied in the preparation of the interim financial statements are the same as those applied in the annual financial statement as of 31 December 2006.

NOTE 3:- DIVIDEND PAID

On June 25, 2007, the Company distributed dividend in the amount of £ 0.01 per share.

The total dividend amounted to $ 827 thousand, of which $ 713 thousand was paid in cash.

The remaining $ 114 thousand were recorded as a short-term liability.

NOTE 4:- SHARE-BASED PAYMENT

During the six months ended June 30, 2007 781,000 shares options were granted to senior executives and other employees under the stock options plan. The exercise price of the options is equal to the market price of the shares on the date of grant. The fair value of the options granted is estimated at the date of grant using the Black & Scholes pricing model, taking into account the terms and conditions upon which the options were granted. The contractual life of each option granted is until 31 December 2013. There are no cash settlement options. The weighted average fair value of options granted during the six months ended 30 June 2007, was estimated on the date of grant using the following assumptions:

Expected volatility (%) 37.03
Risk free interest rate (%) 5.54
Expected life (years) 5.05
Share price (£) 0.792

NOTE 5:- SEGMENT REPORTING

a. General:

1. The Group companies operate in two principal business segments: location tracking systems and security and home management.

2. All revenues and expenses are allocated directly to the business segments.
