Taking Property Protection to the Top

With the Ultimate Outdoor Detector

TOWER®-20AM shines a new light on outdoor intrusion detection.

• Innovative Octa-QUAD™ technology accurately distinguish between moving trees and bushes, swings, roaring animals and real human movement.
• V-Slot® technology - provides high resistance to environmental interferences and vandalism.
• Market-leading black mirror optics for high immunity to white light mainly from direct sunlight and car headlights.
• Unprecedented, complete anti-masking protection.
• Available in hardwired and wireless models: Wireless version works with all Visonic PowerMax® home security systems – providing a complete solution for full protection of the house, inside and out.
