Visonic Launches All-in-one Professional Grade Wireless Security Solution

Tel Aviv, Israel – April, 2009 – Visonic Ltd., a leading developer and manufacturer of cutting-edge home security and safety systems and components, today announced the release of the PowerMax[®]Complete control panel. Especially designed for residential and small office customers, this all-in-one professional-grade wireless security and personal safety solution packs the full range of communication, configuration and expansion options into a single, all-in-one modular wireless panel.

With the advent of the IP revolution, consumers around the world are increasingly disconnecting from standard PSTN telephone lines. Instead, they are moving to broadband-based Voice over IP (VoIP) or using their mobile phones as their sole communications channel. At the same time, central alarm stations are recognizing that the future belongs to IP and cellular communications due to their reliability and the opportunities they open to improve services.

PowerMaxComplete provides the perfect solution for this evolving market by including a built-in PSTN communicator while also offering easy-to-add internal, field-upgradeable GSM/GPRS or IP communications modules, as well as an extensive range of accessories and expansion options. The ability to add internal communications modules ensures maximum reliability in the delivery of events to the alarm central station by facilitating internal redundancy of GPRS, GSM and SMS.

Flexible configuration options

Additional configuration options available with PowerMaxComplete include an optional proximity reader for easy and rapid arming and disarming and the option to order the panel with or without various voice functions, such as two-way voice communication, voice prompts and a family message center. The solution can be even further extended with the expander module, which adds two additional hardwired zones, a wired siren output and more.

"At Visonic, we are committed to helping our customers answer varied and changing needs," said Avishay Deutsch, VP Marketing & Sales at Visonic. "By providing a system as modular and flexible as the PowerMaxComplete, we enable distributors and installers to stay ahead of significant technological shifts such as fewer PSTN-connected homes. This, together with the ability to choose a system with or without voice functions, gives our customers the versatility to offer homeowners the required functionality in the most cost-effective solution."

Easy to install, highly reliable

Due to its professional-grade architecture, PowerMaxComplete ensures fast and simple installation and operations, and highly reliable wireless performance. An easy-view LCD display and icon-based keypad make programming intuitive and a side opening ensures easy wiring. Maximum reliability is also assured through the main PCB board protection from accidents or sabotage.

About Visonic

The Visonic Group (LSE:VSC.L;TASE:VSC.TA), founded in 1973, is an international developer and manufacturer of high-quality electronic security systems and components. We are dedicated to enhancing people's way of life by increasing their sense of security. Our easy-to-use and innovative Security and Home Control systems and Home Healthcare and Telemedicine solutions are vital parts of everyday family life. By providing real-time connectivity between families, homes, property, care givers and community support networks, we empower people to pursue their daily lives with full confidence that the people and things they care most about are safe and comfortable. Visonic is headquartered in Israel, where we operate a development center and manufacturing plant. Our sales and marketing subsidiaries in the USA, Germany, UK, Poland, Spain and Hong Kong are supplemented by a worldwide network of distributors, serving a growing installed base that spans more than 70 countries.
