Visonic further improves home owners' security with two new perimeter wireless detectors – CLIP PG2 and MC-302E PG2 – for its PowerMaster® Alarm Systems

Tel Aviv, Israel – November 29, 2011 – Visonic Ltd., a leading manufacturer of cutting-edge home security and safety systems, today announced the latest enhancement of its PowerMaster® family – the CLIP PG2 and MC-302E PG2, two new PowerG-based wireless perimeter detectors.

The property perimeter is the first line of intrusion. Perimeter detectors will provide the first warning when intruder tries to break in. Early and fast responses to intrusion can considerably reduce risk of burglary and damage to property. With the new CLIP PG2 and MC-302E PG2, Visonic answers this need of home owners and improves property protection.

The CLIP PG2 detector combines state-of-the-art curtain detection capabilities with a miniature, unobtrusive housing design. The detector is easily installed and can be programmed to cover one of three ranges, according to the type of installation. It is ideal for perimeter protection, by creating virtual curtains along doors, windows, and all-glass walls or between rooms.

The MC-302E PG2—a PowerG-based door/window magnetic contact—features a built-in reed switch and an auxiliary hard-wired input into a single compact and elegant housing design. Using the auxiliary input for additional devices makes it perfect in cases where there is a need for two detectors in a single point of entry: e.g. shops that have double doors or a combination of window and bar door.

Both CLIP PG2 and MC-302E PG2 utilize Visonic's PowerG technology for superior functionality. PowerG two-way Frequency Hopping Spread Spectrum FHSS - TDMA technology – provides robustness and reliability closer than ever to wired systems and Transmission range is far greater than the industry standard. Using two way communication enables fast and easy installation, remote management and maintenance thus reducing the overall operational costs.

About Visonic

The Visonic Group (TASE:VSC.TA), founded in 1973, is a leading developer and manufacturer of cutting-edge home security systems and components that provide people around the world peace of mind and safety in their homes.
